## Interests

- Playing Guitar
- Walking in Nature

I'm Fullstack DevOps Developer with 4 years experience. I develop web applications, microservices, API implementations using .NET Core, Laravel, Next.js. I use Vue.js, React.js for Front-end. For Database mySQL, postgresQL. I always consider learning new things, use them and stay updated. In devolopment process i give importance using Source Control, Tests, Docker and CI/CD. Besides all this, I develop games with Unity Engine.

## Work experience

### Software Developer

2020 - 2023

Tagum, Izmir

I developed e-invoice creation automation system that works with JSON files whcih gives handy solution for clients.

I developed ERP application and create plugins that connects biggest Marketplace API's and process them to account and create auto generated-einvoices.

I developed micro-apps running background on server to check application/service health and recover in case of unexpected situations.

### Web Developer

2017 - 2018

Bulrog, Izmir

At the time i improved some Wordpress Plugins, Wrote useful tools that gets datas in csv files and create queues to send bulk-emails.

### Web Developer

2016 - 2017

Calisto, Izmir

I developed CRM projects and improved built-in features.
