# UĞUR CENGIZ

I'm Fullstack DevOps Developer with 4 years experience. I develop web applications, microservices, API integrations using Laravel, PHP, Vue, React with RDS like mySQL, postgreSQL. I use node.JS for backend as well with Next.js. I always consider learning new things, use them and stay updated. In devolopment process i give importance using Source Control, Tests, CI/CD. Besides all this, I am interested in developing games with Unity Engine.
